Expense Policy Summary - FY27

This summary sets out the firm's expense rules for financial year 2027, effective 1 July 2026 and prepared by Firm Finance on 15 June 2026. It explains what needs approval before you spend, what receipts to keep, how quickly to submit a claim and when a late claim needs an exception.

Pre-approval

Any single purchase or expense above $500 needs written manager pre-approval before the money is spent. Approval is requested by email or in the expense tool and must name the amount, the purpose and the engagement code. Client-billable spend above $500 also needs the engagement lead to confirm the client has agreed to reimburse it.

Receipts and submission

- A receipt or itemised invoice is required for every item over $25.
- Items of $25 or less need a short description but no receipt.
- Claims must be submitted within 30 days of the expense date.
- Claims submitted more than 90 days after the expense date need a finance exception approved by the Finance business partner before they can be paid.

Corporate cards

Corporate cards are issued to staff who travel regularly. Use the card for travel, accommodation and client meals only, never for personal items. Card transactions still need a receipt and must be matched to a claim within 30 days of the statement date. Lost or stolen cards must be reported to Firm Finance on the same day.

What is not reimbursed

- Alcohol, except where a client host has agreed to it as part of a hosted meal.
- Fines, penalties and parking tickets.
- Personal entertainment, gifts above the firm gift limit and family travel.

Questions

Contact the Finance business partner for your engagement. Exceptions are recorded and reviewed each quarter. This summary does not replace the full Travel and Expenses Guide, which covers booking, mileage and daily allowances.
