Rate Card and Pricing Assumptions

This rate card lists the fictional hourly rates by role used to price Falcon work for Brightwater Logistics, with the assumptions behind them. It was prepared in November 2025 and revised on 5 January 2026 for use in the proposal and statements of work.

Hourly rates by role

Role	Hourly rate	Notes
Executive sponsor	$320	Oversight, not billed to the fixed fee
Project lead	$210	Plan, risks, client management
Delivery lead	$195	Sprint planning and quality
Senior engineer	$180	Architecture and core build
Engineer	$150	Build and test
Data analyst	$140	Search quality and evaluation
Designer	$135	Interface and research
Quality analyst	$120	Testing and defects

Pricing assumptions

- Rates are fixed for the 2026 calendar year and are in US dollars
- A working day is eight hours and a sprint is ten working days
- Fixed fees are built from the rates plus a contingency of about 10 percent
- Travel is billed at cost and only with client approval
- Change orders are priced from these rates with the same contingency

Out of the rates

Cloud hosting, licences for third-party tools and client-side staff time are not included and are quoted separately where needed.
